

Kytola Model 2851 Constant Flow Regulator is a sturdy, industrial constant flow regulator designed to provide constant flow of liquids or gases regardless of pressure variations.

Model 2851 is intended for low liquid flows in applications where supply or backpressure varies and for gas flows in applications where backpressure varies.

Model 2851
equipped with
model L flow meter

- For liquid and gas
- Reliable operation
- Easy maintenance
- Max. flow
3 L/min H₂O
100 NL/min air (6 barg)

CONSTANT FLOW REGULATOR **2851**

The regulator is a membrane type differential pressure controller, and it is usually supplied with Model L variable area flow meter.
